Macintosh

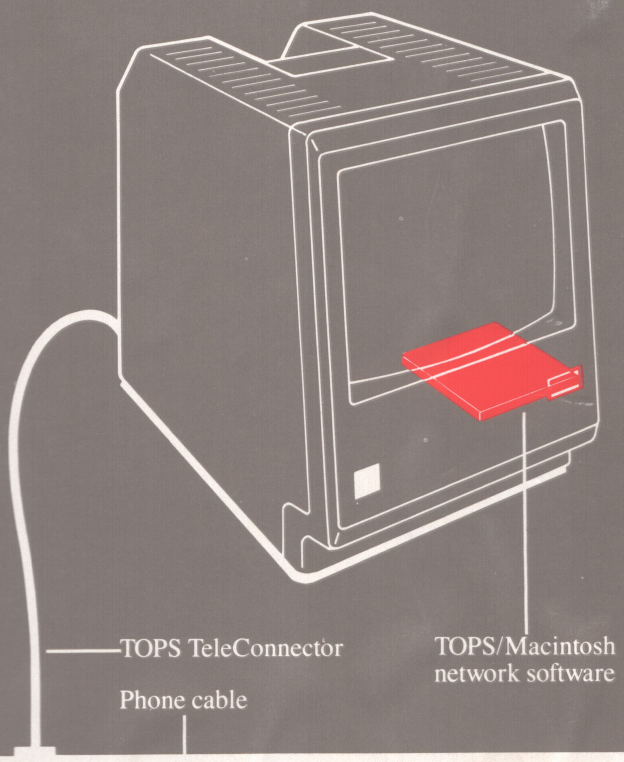
TOPS®

TOPS

TOPS®

Transforms any Macintosh with at least 512K of memory into a TOPS Network station, enabling it to share files, printers, and multi-user applications with other computers on the TOPS Network.

Components of a complete TOPS Network station on a Macintosh.



Connect to Other Computers

TOPS opens up a whole new world of possibilities. You can share files not only with other Macintosh stations, but with IBM PCs & compatibles, Sun Workstations, and other computers connected to the TOPS Network.

Share Network Resources

With TOPS, each network station can share its resources with every other station. Files accessed from a remote station look and behave just as if they were stored locally—even if the files are stored on a different kind of computer than the one you're using.

Get Started Fast

In as little as 3 minutes you can begin to enjoy the benefits of working on a TOPS network from a single, familiar desk accessory.

Print Spooling

TOPS includes a desk accessory called TOPS Spool that handles all PostScript print jobs in the background as you continue to work. TOPS Spool is PageMaker compatible.

Convert File Formats

TOPS includes a utility called TOPS Translators that converts file formats between many popular DOS and Macintosh applications.

Requirements

Computers	Macintosh 512, 512KE, Plus, SE, or II.
Hardware	One TOPS TeleConnector or AppleTalk-compatible DIN-8 or DB-9 connector.
System	System 5.3 and Finder 3.2 or higher.
Compatibility	Fully compatible with all AFP applications.
